Dear Doha,

Thank you for coming to our office.

Please, find the below small project developed within next **Wednesday, 29 Sep.**

Project Title: **A small banking web app**
Project Features:
1. Home Page - should show total balance, fetched from backend. There should be 2 buttons in the page - Deposit & Withdraw
2. Deposit Page - In the deposit page, a person can deposit money which will be added to the total balance.
3. Withdraw Page - In the withdraw page, a person can withdraw money which will be deducted from the total balance.
4. Transaction Page - A page should show all transactions including Deposit & Withdraw transactions

Please, use Django & DRF for backend and vuejs or reactjs for frontend.
If you need any clarification, feel free to text me.

Please, come to our office for the technical interview on **Thursday, 30 Sep.**

Regards,
Ohidul Alam
CTO & Founder
